## Psychiatry Research: Neuroimaging

### The Official Publication of the [International Society for Neuroimaging in Psychiatry](#)

The *Neuroimaging* section of *Psychiatry Research* publishes manuscripts on positron emission tomography, magnetic resonance imaging, computerized electroencephalographic topography, regional cerebral blood flow, computed tomography, magnetoencephalography, autoradiography, post-mortem regional analyses, and other **imaging techniques**. Reports concerning results in **psychiatric disorders**, **dementias**, and the effects of **behaviorial tasks** and **pharmacological treatments** are featured. We also invite manuscripts on the methods of obtaining images and computer processing of the images themselves. Selected case reports are also published.

#### Benefits to authors

We also provide many author benefits, such as free PDFs, a liberal copyright policy, special discounts on Elsevier publications and much more. Please click here for more information on our [author services](#).

Please see our [Guide for Authors](#) for information on article submission. If you require any further information or help, please visit our support pages: <http://support.elsevier.com>
