## ABOUT THE ROLE

The Research Fellow will conduct research in the area of clinical intervention development for people with addiction problems which may include alcohol, drugs, gambling and food.

This will include:

- Initiating and conducting research under supervision as a member of a team to achieve the objectives of the Deakin funded project. These duties include: contribution to the implementation of interventions addressing addiction problems within the alcohol and drug services sector. Depending on appropriate qualifications the fellow may be expected to deliver the intervention as a research clinician. Completion of data collection and entry for post-intervention, analysis. Contribute to write-up of research and publications from evaluation. Development of at least two grant applications.
- Contributing to building an active research record, prepare findings for oral and written communication including publications.
- Effectively producing data and maintain data protocols relevant to the clinical studies.
- Constructively contributing to a vibrant research team, including participating with colleagues in developing and maintaining links and partnerships with Turning Point, Eastern Health.

## ABOUT YOU

- Higher level degree in Psychology with a substantial research component.
- Demonstrated skills in the coordination of data collection, data entry and analysis and Excel.
- Demonstrated ability to work effectively as a member of an interdisciplinary team.
- Demonstrated ability to plan and implement high quality clinical research in the addictions or mental health area.
