

# EpaMax Omega 3 - High Strength

Patient gathers information on a vast range of over-the-counter treatments and beauty products from reputable websites and registered online pharmacies. We perform a price comparison so that you can see who offers the best price.

EpaMax(TM) Omega 3 - High Strength - Revolutionary New, Omega-3 Supplement

EpaMax contains a high-strength formulation of EPA & DHA proven to support brain, heart & joint health EpaMax is a concentrated omega-3 EPA food supplement providing 330mg of EPA (eicosapentaenoic acid) and 220mg of DHA (docosahexaenoic acid) in a 1000mg capsule.

EpaMax has been carefully developed by leading pharmacists and nutritionists to help support healthy heart, joint and brain function. Omega-3 supplements help support healthy heart & brain function Omega-3 supplements help promote emotional & physical wellbeing Omega-3 supplements help inhibit cell inflammation which may help alleviate symptoms of auto-immune disorders Omega-3 supplements help support joint health - and are especially beneficial to conditions caused by an inflammatory response within the body

Why take EpaMax? EpaMax(TM) is a highly concentrated formulation of EPA & DHA omega-3 fatty acids which have been linked to lowered risk of heart disease, improved brain function and relief of pain associated with autoimmune diseases. Take EpaMax fish oil supplements if you want to: Support healthy heart & brain function Promote emotional & physical wellbeing Help alleviate symptoms of lower moods Inhibit cell inflammation Support joint health This omega-3 fatty acid enriched formula helps allow brain cells to transmit chemicals effectively helping to improve brain and the nervous system function. The EPA & DHA within EpaMax(TM) may even help reduce the inflammatory response in the body helping to lower the risk of heart disorders and alleviate

symptoms relating to auto-immune disorders such as soreness in joints or infections. Effectively, EpaMax(TM), with its high strength formulation of DHA & EPA, may help produce hormone-like substances that regulate physiological functions including blood pressure, blood clotting, nerve transmission and inflammatory responses. Is EpaMax right for me? EpaMax fish oil supplements contain omega-3 fatty acids and have been scientifically shown to help to support healthy heart and brain function, help alleviate symptoms of low moods and help inhibit the cell inflammatory response within the body that cause pain in certain auto-immune diseases or infections. EpaMax is an all-natural, high strength formulation of omega-3 fatty acids EPA & DHA and thus may help support heart, brain and joint health. The essence of neural efficiency is an interplay between cognitive performance and brain effort. Humans tend to modify their brain activity to maintain an acceptable level of performance. Hence, when only cognitive function is measured, without taking into account brain activation levels, one might expect this inconsistent interaction between supplementation and performance (leaving aside differences in the literature in terms of age group and omega-3 content of food ingested). Research - Can EPA-rich supplements help brains work 'less hard' and boost mental performance? Article by Stephen Daniells | Nutraingredients-USA 'Breaking News on Supplements & Nutrition' | 10 Feb 2014 Omega-3 supplements rich in EPA may improve cognitive performance with a reduction in neural activity observed, indicating that the brain worked less hard, report researchers from Australia. On the other hand, DHA-rich supplements were associated with an increase in functional activation and no improvement in cognitive performance, according to results published in Human Psychopharmacology: Clinical and Experimental. Isabelle Bauer from Swinburne University and her co-authors said that this indicated that DHA-rich supplements are less effective than EPA-rich supplements for boosting neurocognitive functioning. However, Harry Rice,

PhD, VP of Regulatory & Scientific Affairs for the Global Organization for EPA and DHA Omega-3s (GOED), told us that, while the results are fascinating, he is not certain how to interpret them given this isn't a valid E
